EXPERIENCE

Business Analyst

Innowhyte inc.

04/2023 - Present

Transformed the bank reconciliation process by collaborating with stakeholders to automate the workflow, implementing a comprehensive solution using Power Automate, Python, MS Form, Tally and SharePoint for detailed transaction reports, and deploying it on an Azure VM for end-to-end testing. Continuously refined the solution based on stakeholder feedback, resulting in a significant reduction in reconciliation time from 3hrs per 1000 transactions to 5-30 minutes depending on number of unreconciled entries and providing holistic reports and actionable insights on transactions within a given period.

Contributed to project team success by meticulously crafting detailed wireframes in Figma, ensuring effective communication with clients and facilitating the smooth execution of upcoming development.

Spearheaded multiple proof-of-concept initiatives, exploring emerging technologies like OpenAI API integration, LLM models, and RAG, enriching expertise in cutting-edge solutions and innovation.

Currently part of a GenAI GTM team. Mainly focused on developing multi-agent workflows using no/low-code platforms to simplify complex processes and improve outcomes.

Business Analyst Intern

Quantiphi inc.

08/2022 - 02/2023

Led a team of 5, conducting daily scrums and ensuring on-time delivery by proactively addressing issues and escalations.

Led kick-off meetings with RACI matrix and RAID log.

Created and presented weekly project reports.

Used automated sheets and dashboards for efficient communication and collaborated with the development team to solve client challenges.

SUMMARY

Analyst with expertise in process mapping, data analysis, and Automation. Skilled in Python, SQL, and Excel to optimize workflows and extract actionable insights. Quick to adapt to new technologies, I excel at building solutions from scratch to tackle complex business challenges. Passionate about leveraging emerging tools like Generative AI to drive data-driven decisions and innovation, while aligning data solutions with strategic business goals.

SKILLS

SQL, Excel, Python, Tableau

Wireframing, Gap analysis, Business process improvement

EDUCATION

Engineering Physics

IIT BHU
